ELECTRICAL ENGINEER | WED DEVELOPER

## SKILLS

- Web Development
- Problem-Solving And analytical skills
- UI/UX
- Project Management Tools
- Graphic design using adobe illustrator and photoshop
- Circuit Design using Kincaid

## EDUCATION

- JUNIOR SECONDARY**  
Kanyonyo Secondary School  
2012 - 2014
- SENIOR SECONDARY**  
Kanyama Technical Secondary School  
2014 - 2017
- BACHELOR OF TECHNOLOGY**  
Electrical and Electronic Engineering  
Jain University  
2020 - 2024

### RELEVANT COURSEWORK:

Digital Electronics, Control Systems, Power Systems, Microprocessors and Microcontrollers, Electric vehicles ,power electronics ,battery technology, Ev charging stations, .

### LANGUAGE

## PROFILE INFO

I am a qualified web developer and electrical engineer with 2 years years of experience in website design. Strong creative and analytical skills. Team player with an eye for detail.

## COVER LETTER

Dear Sir/madam,

I am writing to express my interest in the research internship in Electric Vehicle Design at King Abdul University. As a student of Electrical and Electronic Engineering, I am eager to gain hands-on experience in the field through this internship.

I have developed a keen interest in electric vehicle design, and I am particularly impressed by the research focus on advanced technologies in the department. I am confident that my skills and knowledge in web development, circuit design and simulation, microcontroller programming, and machine learning will make me a valuable addition to the team.

Thank you for considering my application. I look forward to discussing my qualifications with you further.
